1.0 Introduction

This document sets out key priorities for The Marches Local Enterprise Partnership (LEP) Ltd in financial year 2021/22. It is a dynamic document and will be subject to change as the LEP seizes opportunities and responds to recent challenges which have significantly impacted on our economy.

If significant changes are made to these priorities, these will be reflected in an updated version of this document posted on the LEP's website www.marcheslep.org.uk and shared with stakeholders as soon as possible.

2.0 Summary and Strategic Objectives

Our Vision

The LEP's Strategic Economic Plan (SEP) was formally approved in March 2019 and is available on the [LEP's website](#). The SEP sets out the LEP's agreed [vision](#) for the area and a range of partnership actions to achieve this vision.

Covid-19 – Driving Economic Recovery

Through strategic work with partners, we will continue to drive economic recovery across The Marches, recognising the significant impact that the pandemic has had on our economy and communities.

The [SEP's evidence base](#) sets out our understanding of how The Marches's economy functioned prior to the COVID-19 outbreak. Working with local authority partners and the three Business Boards of Herefordshire, Shropshire and Telford & Wrekin, we have used our [data and research resources](#), coupled with our local intelligence and relevant Government documents, to understand the impact of the pandemic on our different sectors and communities and have identified opportunities to drive economic recovery. This work has culminated in the production of the Marches LEP's Local Economic Recovery Plan, a live document that will evolve and be amended as further data emerges. Government funds will be required to implement many of the actions identified in the plan.

In line with the Government's aspirations to support levelling up and net zero, we will continue to promote our area's strengths, protect our high-quality natural environment and support sustainable growth that provides economic opportunities for our businesses and residents.

Impact

We will continue to monitor the LEP's suite of Key Performance Indicators (KPIs). These support the LEP in making informed decisions on interventions which will drive economic growth across The Marches, in understanding our economic challenges and in assessing our impact. Our current economic position may be found at [Performance Management Framework and Current Position](#).

Our achievements from the last financial year will be included in our Annual Report 2020/21 due to be launched in September 2021 and which will provide an overview of the LEP's activity in the year across our 2,300 square mile geography.

Planning for the Future

During 2021/22, it is critical that we continue working with Government to establish the LEP's future strategic priorities. The matters below will inform the LEP's purpose going forward and determine the resource requirements necessary for the LEP to continue to drive economic growth across Herefordshire, Shropshire and Telford & Wrekin.

Core Funding 2021/22

As per July 2021, LEP core funding for financial year 2021/22 has yet to be received putting the LEP's current work stream at some considerable risk.

LEPs' Review

The LEPs' review was commissioned in mid-April by The Secretaries of State for the Ministry of Housing, Communities & Local Government (MHCLG) and the Department for Business, Energy & Industrial Strategy (BEIS), with the purpose to shape the future role of LEPs. Initial proposals (not yet agreed by Ministers) are that LEPs will fulfil the following roles going forward:

- To provide strategic place-based economic expertise and insight to central and local Government and helping secure long term inclusive growth at local level as part of the Plan for Growth.
- To identify key local sectors and industries, and to design and deliver interventions to make them more competitive, making the most of local opportunities.
- To deliver a programme of joined-up, expert and tailored business advice and support for local businesses through the Growth Hubs, ensuring they can play their full part in the Plan for Growth.

Ministers are expected to set out their initial proposals in the Summer, with final outcomes finalised in the Autumn.

Levelling Up Agenda

Three new funding pots to support economic growth and "Levelling Up" of the UK economy were announced in the Budget, on 3 March 2021, helping support recovery and building opportunity, with funding weighted towards places where community assets can make the most difference.

For England, these new funds replace the Local Growth Fund (LGF) and Getting Building Fund (GBF) which have been managed by LEPs over the past eight years. The three new funds are:

- The *Levelling Up Fund*, which brings together MHCLG, the Department for Transport and Treasury to invest £4.8 billion in infrastructure projects that improve everyday life and support town centre and high street regeneration, local transport and cultural and heritage assets.
- The *UK Community Renewal Fund*, which in financial year 2021/22 is to provide £220 million additional funding to help places across the UK to prepare for the introduction of the UK Shared Prosperity Fund (UKSPF), the proposed successor of the EU Structural Investment Funds.

- The Community Ownership Fund, which is to provide £150 million to help ensuring that communities across the UK can support and continue benefiting from local facilities, community assets and amenities most important to them such as pubs, sports clubs, theatres and post office buildings.

These three funds apply to the whole of the UK and are to be managed by Local Authorities. A Levelling Up White Paper is expected to be published later this year, articulating how new policy interventions will improve opportunity and boost livelihoods across the country as it recovers from the pandemic.
