Marches LEP to wind down - statement

In line with the Government's decision to withdraw all funding from Local Enterprise Partnerships from April 2024, the Marches LEP will undertake a winding down process over the coming months.

The LEP is now working with the region's three local authorities and partners to ensure a smooth transition of its responsibilities in order that business support and LEP-supported projects continue to be successfully delivered.

We await clarification from Government over a number of issues relating to this transition.
